

PROVIDING WOODWARD GOVERNOR ON EXCHANGE BASIS

Providing governor on Exchange Basis is the service where client's used governor is replaced with previously overhauled, second-hand, "good-as-new" governor, identified by the Part Number, from PBM'S stock.

Providing the governor on Exchange Basis consists of the following steps:

1. Client sends Request for Offer, indicating the exact Part Number of his used governor
2. If required governor is available on PBM's stock, governor is shortly tested on a Test Stand, cleaned and visually inspected by the senior engineer and, if all compliant, marked as approved for shipping.
3. Governor is carefully packed in a wooden case and fastened with screws to the wooden base inside the case in an upright position. Case is filled with protective material to prevent any damage or pollution. Packaging costs are included in OH price.
4. Governor is shipped to the designated client's address, vessel or the agent. Transportation costs are not included in OH price.
5. Governor is installed on the vessel and commissioned by the crew or by PBM service engineer. Installation and commissioning of the governor is not included in Exchange Basis service price but charged as a separate service.
6. Client sends its used (replaced) governor to PBM's workshop address as instructed by PBM.
7. When client's used governor reaches PBM's workshop, the complete overhauling process is performed, as described in our FAQ document – Overhauling Governor in the workshop
8. After completing the overhauling process, "good-as-new" governor is put on PBM's stock, ready to be used in next Exchange Basis service
9. Invoicing the client, based on the Final Defect Report

TERMS AND CONDITIONS:

If client's used governor was not in use (kept as a spare on stock or at the vessel), client must clearly note this to PBM.

PBM GROUP
